EMMY NOETHER
Mathematician

EMMY NOETHER
Mathematician

Noether's Theorem, connecting laws of symmetry and conservation, has important uses in physics. She also focused with great originality on abstract algebra and topology.

Date of Birth:
March 23, 1882

Birthplace:
Erlangen, Germany

Notable Awards:
- Ackermann-Teubner Memorial Award (1932)
- Addressed International Congress of Mathematics (1932)
- Annual "Noether Lecture" in her honor
